

TA Recruitment and Distribution System Interaction Prototype(First draft)

Team No.: Group 013

This document is the first draft prototype of the course assignment and is used to describe the main page structure and the typical task path of three types of users. Each section contains short text descriptions and screenshots of the interface for quick understanding of the design intent. Marking as first draft indicates that the interaction of layout, copywriting and details may still be adjusted , does not represent a final implementation.

Source of interface material: PNG screenshot under UI design/project directory.

1. System Entry/Role Selection

The first interface after the user enters the system is used to distinguish three roles: TA, Module Organiser and administrator. The first draft stage only reflects the information structure and the main entrance, and the follow-up can supplement the guide copy.

2. Teaching Assistant - Login

TA logs in with student/ID and password. Description: This page displays the form layout and verification prompt area; Details such as actual error prompts, remember to log in, etc. can be refined in the next iteration.

4. Teaching Assistant - Workbench(Personal Information)

Example of a page on the workbench after login: Show or edit a profile. The complete workbench will also include job browsing, application progress, resume and other modules; This manuscript describes the navigation and content area layout.

The screenshot displays the '应聘者工作台' (Applicant Workbench) interface. At the top, there is a navigation bar with a '← 首页' (Home) link on the left, the title '应聘者工作台' in the center, and a '退出登录' (Logout) link on the right. Below the navigation bar is a horizontal menu with four items: '个人信息' (Personal Information), '简历与匹配' (Resume & Match), '开放岗位' (Open Positions), and '我的申请' (My Applications). The '个人信息' section is currently active and highlighted with a blue border. Inside this section, there is a sub-header '个人信息' followed by a note: '维护姓名、学号与技能标签, 用于岗位匹配与组织者查看。' (Maintain name, student ID, and skill tags for position matching and organizer viewing). Below this note are three input fields: '姓名' (Name) with the value '丁', '学号' (Student ID) with the value '20', and '技能 (逗号分隔)' (Skills (comma-separated)) with the value 'Java, Python, 监考'. At the bottom of the form is a blue button labeled '保存资料' (Save Information).

5. Course Organizer - Login

Course organizer account login entry, consistent with the TA style to reduce learning costs. The first draft does not expand the process of forgetting passwords and so on.
